OF WESTERN NEW ENGLAND

AWESOME ACTIVITY WEEKS SUMMER 2017

SECRET AGENT LAB

Entering grades 1-5

Develop your special agent and detective skill in this super hands-on week of fun! Uncover the science involved in evidence gathering and analysis. Sharpen your secret agent skills and discover how chemistry and the science of forensics can come to the aid of a secret agent. Identify and collect evidence – from fingerprints to tracks to trash! Secret agents-in-training will use science and awesome technological tools to connect the dots and help sniff out the suspects in this investigation into the science of sleuthing.

RED HOT ROBOTS

Entering grades 3-6

Delve into the fascinating world of robotics and machines in this weeklong program. Children will *construct their own robots* while gaining a working knowledge of the science of circuits, wheels, gears, and sensors. They will experience different types of robotic devices throughout the program, including line-tracking and programmable robots. They'll also learn about simple machines and how they, like robots, are used to make life easier. Robots go home with campers on the last day of the program. All supplies included.

Give your child the best

BIRTHDAY PARTY EVER!
